1. **Marko finished top with 102 sips, 11 ahead of Rob**
   Marko led for 15 of 17 rounds; the lead changed hands 1× and was settled in round 3 · Marko claimed 2 of 2 milestones
2. **Per round played, the table was level at 5.2–6.0 sips**
   Marko 6.0 · Rob 5.4 · David 5.2
3. **Credits cut the bill by 7%: 304 sips owed, 282 drunk**
   Biggest credit: Bust vote credit (13 sips)
4. **You mostly drink because others win: 27% of sips vs 20% from your own losing hands**
   Blackjacks, doubled and split wins and suited hands all hand sips to everyone else
5. **Following basic strategy paid: 44% of book decisions won vs 30% when deviating**
   Most common deviation: standing when the book says hit (14×)
6. **Rob ran the toughest house, winning 59% of hands as dealer**
   David's table was the most generous at 43% (table average 50%)

Marko led for 15 of 17 rounds and finished 11 sips clear of Rob

KEY MOMENTS

- ! **Round 1** David hit hard 15 vs Q♠ and won
- 1 **Round 3** Marko takes the lead
- ⇄ **Round 7** Hard Dealer Switch: David drinks 8
- ◆ **Round 10** Marko first to 50 sips
- ⇄ **Round 13** Hard Dealer Switch: David drinks 10
- ◆ **Round 17** Marko first to 100 sips

SO WHAT

Marko took control in round 3 and never gave it back; the chasers closed the gap to 11 sips but never got ahead.

Source: Black(Out)Jack drink log and decision log, session Spade928, 17 rounds · Cumulative net sips after credits

Black(Out)Jack

On a per-round basis the field is level (5.2–6.0 sips); Marko drank 1.1× David's rate

TOTAL NET SIPS

PLAYER	ROUNDS PLAYED	SIPS AS DEALER	CLEAN ROUNDS	WORST SINGLE ROUND	SIPS / HAND
Marko	17	16	1	14 (R13)	2.42
Rob	17	8	0	15 (R16)	1.89
David	17	20	0	13 (R17)	2.00

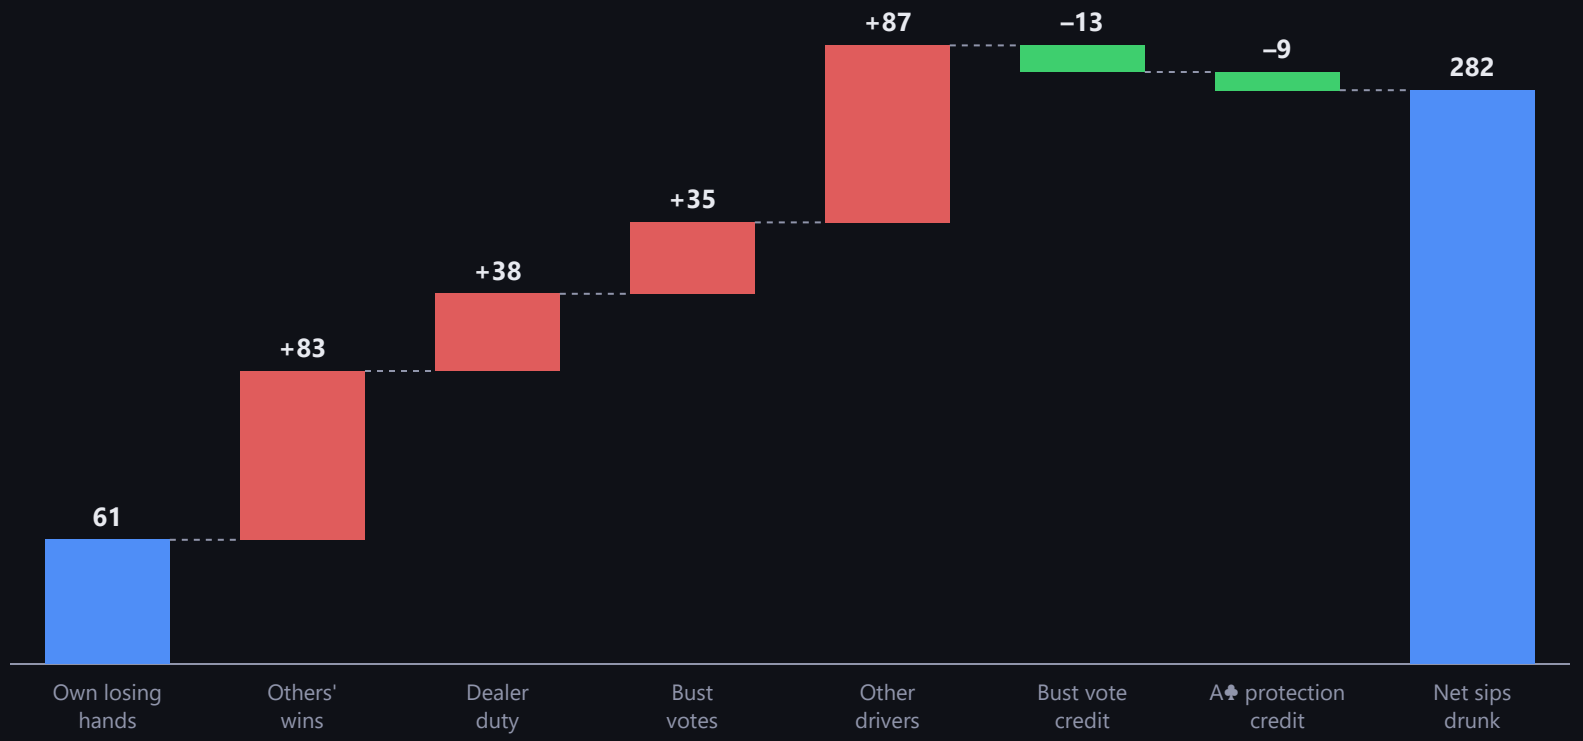

AGAINST A TYPICAL TABLE

Card for card, this table drank 2.1 sips per hand against the simulator's 2.2 (3 players · 1 deck, full rules at 1.0×, no Easy Mode): 4% less. Per round it was 5.5 sips against 4.4; the rest of that gap is side games, milestones.

Black(Out)Jack

Credits removed 22 sips from a gross bill of 304

7%

of the gross bill was cancelled by credits

SO WHAT

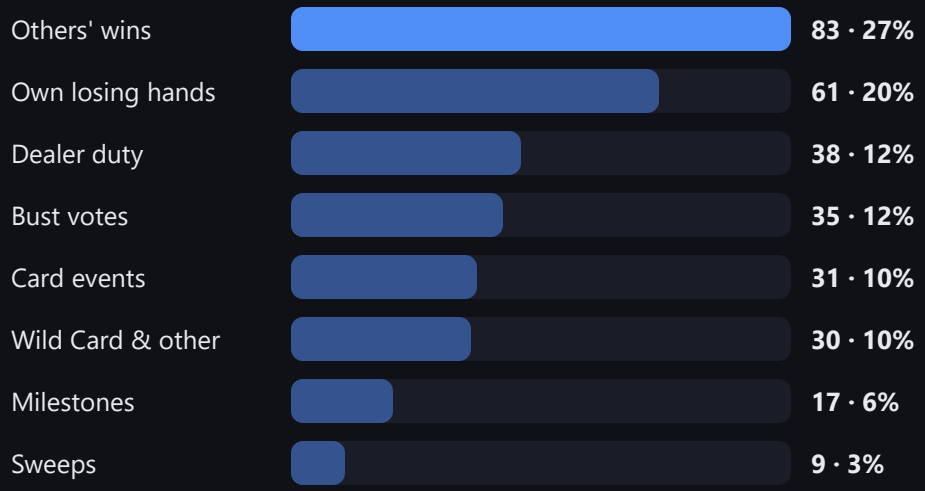

Bust vote credit was the biggest lever (13 sips). Without a 4th player there is no Easy Mode halving, so the gross bill is mostly what gets drunk.

Other drivers: Card events +31, Wild Card & other +30, Milestones +17, Sweeps +9

Source: Black(Out)Jack drink log and decision log, session Spade928, 17 rounds · Gross = all positive sip events before credits

Other players' wins drove 27% of all sips, 1.4× more than your own losing hands

SO WHAT

The fastest way to drink less is not to lose less but to sit next to fewer winners: other players' wins and sweeps make up 30% of the gross bill.

SO WHAT

When Rob deals, expect to lose more hands. David's deals are the time to double down. Marko got caught by the Hard Dealer Switch most: 2× for 14 sips.

SO WHAT

At 37% accuracy the bust vote is worse than a coin flip, and it moved the table's bill by +22 sips. The Wild Card is pure entertainment. Targeted Drinking hit Marko hardest: 4 wrong calls for 6 sips. Not played this session: Dealer Lottery.

HOUSE RULES

Not part of this export: the in-app recap lists which rules were on.

Methodology and definitions

Net sips	Every sip event after credits (Easy Mode halving, Dealer Lottery, bust-vote, Lucky Sevens, A♣ protection).
Gross sips	All positive sip events before credits; used for driver mix.
Round played	A round in which the player made at least one decision (decision log).
Clean round	A round played with zero or negative net sips.
Basic-strategy match	Share of hit/stand/double/split decisions equal to the engine's basic-strategy action: its programmed basic-strategy tables plus the drinking-mode overrides (splitting unsuited 10s when that rule is on, splitting 9s unless the dealer shows 10, doubling 5s and totals of 9-11).
House win rate	Share of player hands lost while that player dealt; pushes count as hands.
Sips per hand	Net sips without side games, milestones and streak handouts, over hands played (hands with a logged decision). The simulator benchmark counts the same way, at full rules and 1.0×.
Avg hand	Starting hand: the two-card total at a hand's first decision (a dealt Blackjack has none, so it isn't counted). Stood on: the total at each stand.
Paid-off risk	A hit or double on a hard total in a hand that went on to win, ranked by the chance the next card busts it (hard 16: 62%, hard 18: 77%); shown from 45%.
Losing streak	Rounds in a row with more hands lost than won, as the L badge counts them; an even round resets it. Clean streak: rounds in a row with no net sips.
Milestone round	The round the claimer's running net total passed the step; the game counts the sip ticker, which ignores credits, so it can be a round earlier.
Drink Rate factor	A seat's multiplier on the sips it owes: boosters (1.2–1.5×) drink more, discounts (0.2–0.8×, e.g. wine 0.6×) drink less. Aces, the bust vote, 666/777 and the Wild Card skip boosters. Avg factor = mean over the rounds the seat played.
Driver categories	Others' wins: Blackjack bonus, Doubled win, Split win, Suited winning, 5+ card win; Own losing hands: Net hand losses, Lost doubled, Lost suited; Sweeps: Other-player sweep, All-hands sweep; Bust votes: Bust vote wrong, Bust vote handout; Dealer Lottery: Dealer Lottery; Card events: Ace dealt, Four Aces, Devil's Hand, Dealer suited; Dealer duty: Hard Dealer Switch; Milestones: Milestone, Worst average; everything else: Wild Card & other.
