1. **Rob finished top with 263 sips, 7 ahead of Marko**
   Marko led for 40 of 45 rounds; the lead changed hands 2× and was settled in round 42 · Marko claimed 5 of 5 milestones
2. **Per round played, the table was level at 5.7–5.8 sips**
   Rob 5.8 · Marko 5.7
3. **Credits cut the bill by 7%: 561 sips owed, 519 drunk**
   Biggest credit: Bust vote credit (20 sips)
4. **Drink Rate added 40 sips: 521 owed at 1.0× became 561**
   Rob 1.4× for 9 rounds · Marko 1.4× for 9 rounds
5. **Own losing hands drove the most sips: 24% of the gross bill**
   Others' wins 11% · own losing hands 24%
6. **Following basic strategy paid: 47% of book decisions won vs 33% when deviating**
   Most common deviation: standing when the book says hit (30×)
7. **Marko ran the toughest house, winning 57% of hands as dealer**
   Rob's table was the most generous at 40% (table average 49%)

- **Round 37** Drink Rate 1.4× (Rob, Marko)
- **Round 42** Rob takes the lead
- **Round 44** Marko first to 250 sips

SO WHAT

Marko built the early lead, but the title was settled in the final 4 rounds.

AGAINST A TYPICAL TABLE

Card for card, this table drank 1.8 sips per hand against the simulator's 1.6 (2 players · 1 deck, full rules at 1.0×, no Easy Mode): 9% more. Per round it was 5.8 sips against 3.3; the rest of that gap is side games, milestones and the Drink Rate booster.

Source: Black(Out)Jack drink log and decision log, session Split187, 45 rounds · Rounds played from the decision log · Clean round = no net sips

Credits removed 42 sips from a gross bill of 561; Drink Rate factors added 40 sips

7%

of the gross bill was cancelled by credits

SO WHAT

Bust vote credit was the biggest lever (20 sips). Without a 4th player there is no Easy Mode halving, so the gross bill is mostly what gets drunk.

Other drivers: Others' wins +59, Bust votes +59, Wild Card & other +50, Dealer Lottery +32, Sweeps +25

Other credits: Lucky Sevens -4

SO WHAT

When Marko deals, expect to lose more hands, so bank the Dealer Lottery credits early. Rob's deals are the time to double down. Rob got caught by the Hard Dealer Switch most: 8× for 48 sips.

SO WHAT

At 34% accuracy the bust vote is worse than a coin flip, and it moved the table's bill by +39 sips. The Dealer Lottery cost the table +22 sips. The Wild Card is pure entertainment. Targeted Drinking hit Marko hardest: 11 wrong calls for 29 sips.

HOUSE RULES

Not part of this export: the in-app recap lists which rules were on.

Methodology and definitions

Net sips	Every sip event after credits (Easy Mode halving, Dealer Lottery, bust-vote, Lucky Sevens, A♣ protection).
Gross sips	All positive sip events before credits; used for driver mix.
Round played	A round in which the player made at least one decision (decision log).
Clean round	A round played with zero or negative net sips.
Basic-strategy match	Share of hit/stand/double/split decisions equal to the engine's basic-strategy action: its programmed basic-strategy tables plus the drinking-mode overrides (splitting unsuited 10s when that rule is on, splitting 9s unless the dealer shows 10, doubling 5s and totals of 9-11).
House win rate	Share of player hands lost while that player dealt; pushes count as hands.
Sips per hand	Net sips without side games, milestones and streak handouts, over hands played (hands with a logged decision). The simulator benchmark counts the same way, at full rules and 1.0×.
Avg hand	Starting hand: the two-card total at a hand's first decision (a dealt Blackjack has none, so it isn't counted). Stood on: the total at each stand.
Paid-off risk	A hit or double on a hard total in a hand that went on to win, ranked by the chance the next card busts it (hard 16: 62%, hard 18: 77%); shown from 45%.
Losing streak	Rounds in a row with more hands lost than won, as the L badge counts them; an even round resets it. Clean streak: rounds in a row with no net sips.
Milestone round	The round the claimer's running net total passed the step; the game counts the sip ticker, which ignores credits, so it can be a round earlier.
Drink Rate factor	A seat's multiplier on the sips it owes: boosters (1.2–1.5×) drink more, discounts (0.2–0.8×, e.g. wine 0.6×) drink less. Aces, the bust vote, 666/777 and the Wild Card skip boosters. Avg factor = mean over the rounds the seat played.
Driver categories	Others' wins: Blackjack bonus, Doubled win, Split win, Suited winning, 5+ card win; Own losing hands: Net hand losses, Lost doubled, Lost suited; Sweeps: Other-player sweep, All-hands sweep; Bust votes: Bust vote wrong, Bust vote handout; Dealer Lottery: Dealer Lottery; Card events: Ace dealt, Four Aces, Devil's Hand, Dealer suited; Dealer duty: Hard Dealer Switch; Milestones: Milestone, Worst average; everything else: Wild Card & other.
