1. **Rob finished top with 401 sips, 13 ahead of Marko**
   Rob led for 46 of 78 rounds; the lead changed hands 8× and was settled in round 59 · Rob claimed 5 of 8 milestones
2. **Per round played the spread was wide: 5.0–6.3 sips**
   David 6.3 · Rob 5.1 · Marko 5.0 — David's lower total reflects joining in round 46
3. **Credits cut the bill by 8%: 1,088 sips owed, 996 drunk**
   Biggest credit: Bust vote credit (48 sips)
4. **You mostly drink because others win: 25% of sips vs 19% from your own losing hands**
   Blackjacks, doubled and split wins and suited hands all hand sips to everyone else
5. **Following basic strategy paid: 50% of book decisions won vs 35% when deviating**
   Most common deviation: standing when the book says hit (67×)
6. **David ran the toughest house, winning 55% of hands as dealer**
   Marko's table was the most generous at 46% (table average 48%)

SO WHAT

Rob took control in round 59 and never gave it back; the chasers closed the gap to 13 sips but never got ahead.

Per round played the field was spread out: David drank 1.3× Marko's rate

David	33	21	1	18 (R48)	2.01

AGAINST A TYPICAL TABLE

Card for card, this table drank 1.9 sips per hand against the simulator's 2.2 (3 players · 1 deck, full rules at 1.0×, no Easy Mode): 14% less. Per round it was 5.3 sips against 4.4; the rest of that gap is side games, milestones.

Credits removed 92 sips from a gross bill of 1,088

8%

of the gross bill was cancelled by credits

SO WHAT

Bust vote credit was the biggest lever (48 sips). Without a 4th player there is no Easy Mode halving, so the gross bill is mostly what gets drunk.

Other drivers: Bust votes +118, Milestones +93, Wild Card & other +39, Dealer Lottery +38, Sweeps +31

Other credits: Lucky Sevens -10

Methodology and definitions

Net sips	Every sip event after credits (Easy Mode halving, Dealer Lottery, bust-vote, Lucky Sevens, A♣ protection).
Gross sips	All positive sip events before credits; used for driver mix.
Round played	A round in which the player made at least one decision (decision log).
Clean round	A round played with zero or negative net sips.
Basic-strategy match	Share of hit/stand/double/split decisions equal to the engine's basic-strategy action: its programmed basic-strategy tables plus the drinking-mode overrides (splitting unsuited 10s when that rule is on, splitting 9s unless the dealer shows 10, doubling 5s and totals of 9-11).
House win rate	Share of player hands lost while that player dealt; pushes count as hands.
Sips per hand	Net sips without side games, milestones and streak handouts, over hands played (hands with a logged decision). The simulator benchmark counts the same way, at full rules and 1.0×.
Avg hand	Starting hand: the two-card total at a hand's first decision (a dealt Blackjack has none, so it isn't counted). Stood on: the total at each stand.
Paid-off risk	A hit or double on a hard total in a hand that went on to win, ranked by the chance the next card busts it (hard 16: 62%, hard 18: 77%); shown from 45%.
Losing streak	Rounds in a row with more hands lost than won, as the L badge counts them; an even round resets it. Clean streak: rounds in a row with no net sips.
Milestone round	The round the claimer's running net total passed the step; the game counts the sip ticker, which ignores credits, so it can be a round earlier.
Drink Rate factor	A seat's multiplier on the sips it owes: boosters (1.2–1.5×) drink more, discounts (0.2–0.8×, e.g. wine 0.6×) drink less. Aces, the bust vote, 666/777 and the Wild Card skip boosters. Avg factor = mean over the rounds the seat played.
Driver categories	Others' wins: Blackjack bonus, Doubled win, Split win, Suited winning, 5+ card win; Own losing hands: Net hand losses, Lost doubled, Lost suited; Sweeps: Other-player sweep, All-hands sweep; Bust votes: Bust vote wrong, Bust vote handout; Dealer Lottery: Dealer Lottery; Card events: Ace dealt, Four Aces, Devil's Hand, Dealer suited; Dealer duty: Hard Dealer Switch; Milestones: Milestone, Worst average; everything else: Wild Card & other.
