AGAINST A TYPICAL TABLE

Card for card, this table drank 1.2 sips per hand against the simulator's 1.6 (2 players · 1 deck, full rules at 1.0×, no Easy Mode): 25% less. Per round it was 3.7 sips against 3.3; the rest of that gap is side games, milestones.

Credits removed 25 sips from a gross bill of 264

9%

of the gross bill was cancelled by credits

SO WHAT

Bust vote credit was the biggest lever (14 sips). Without a 4th player there is no Easy Mode halving, so the gross bill is mostly what gets drunk.

Other drivers: Card events +25, Dealer Lottery +22, Milestones +15, Wild Card & other +11, Sweeps +7

Other credits: Lucky Sevens -1

SO WHAT

When Rob deals, expect to lose more hands, so bank the Dealer Lottery credits early. Marko's deals are the time to double down. Marko got caught by the Hard Dealer Switch most: 5× for 27 sips.

Source: Black(Out)Jack drink log and decision log, session Queen273, 32 rounds

Methodology and definitions

Net sips	Every sip event after credits (Easy Mode halving, Dealer Lottery, bust-vote, Lucky Sevens, A♣ protection).
Gross sips	All positive sip events before credits; used for driver mix.
Round played	A round in which the player made at least one decision (decision log).
Clean round	A round played with zero or negative net sips.
Basic-strategy match	Share of hit/stand/double/split decisions equal to the engine's basic-strategy action: its programmed basic-strategy tables plus the drinking-mode overrides (splitting unsuited 10s when that rule is on, splitting 9s unless the dealer shows 10, doubling 5s and totals of 9-11).
House win rate	Share of player hands lost while that player dealt; pushes count as hands.
Sips per hand	Net sips without side games, milestones and streak handouts, over hands played (hands with a logged decision). The simulator benchmark counts the same way, at full rules and 1.0×.
Avg hand	Starting hand: the two-card total at a hand's first decision (a dealt Blackjack has none, so it isn't counted). Stood on: the total at each stand.
Paid-off risk	A hit or double on a hard total in a hand that went on to win, ranked by the chance the next card busts it (hard 16: 62%, hard 18: 77%); shown from 45%.
Losing streak	Rounds in a row with more hands lost than won, as the L badge counts them; an even round resets it. Clean streak: rounds in a row with no net sips.
Milestone round	The round the claimer's running net total passed the step; the game counts the sip ticker, which ignores credits, so it can be a round earlier.
Drink Rate factor	A seat's multiplier on the sips it owes: boosters (1.2–1.5×) drink more, discounts (0.2–0.8×, e.g. wine 0.6×) drink less. Aces, the bust vote, 666/777 and the Wild Card skip boosters. Avg factor = mean over the rounds the seat played.
Driver categories	Others' wins: Blackjack bonus, Doubled win, Split win, Suited winning, 5+ card win; Own losing hands: Net hand losses, Lost doubled, Lost suited; Sweeps: Other-player sweep, All-hands sweep; Bust votes: Bust vote wrong, Bust vote handout; Dealer Lottery: Dealer Lottery; Card events: Ace dealt, Four Aces, Devil's Hand, Dealer suited; Dealer duty: Hard Dealer Switch; Milestones: Milestone, Worst average; everything else: Wild Card & other.
